

FOR IMMEDIATE RELEASE

**TRIVINCI SYSTEMS TO LAUNCH RACE-KEEPER AT AUTOSPORT INTERNATIONAL SHOW**

STERLING, VA (October 31, 2008) – Trivinci Systems will launch Race-Keeper at the Autosport International Show on January 8-11 in Birmingham, UK.

Race-Keeper is a single box multi-camera plug n’ play video data logging system designed to improve a driver’s racing skills and lap times. With synchronized video, audio and data, Race-Keeper gives drivers the power to analyze performance, with visual evidence of how and why drivers are excelling and where you drivers can improve.

Race-Keeper captures multi-camera on-board video data outings to on-board storage or attached USB key; outings can be offloaded to PC for use with Race-Keeper Comparo software (see below).

Race-Keeper’s standard system includes:

- Video data logger box
- Power loom
- Storage (2GB SD card)
- Camera
- Microphone
- GPS antenna
- Race-Keeper Comparo PC software

Other options are also available:

- Additional cameras (up to a total of four)
- Additional microphone (for stereo audio)
- Remote operator control
- CAN/OBDII interface
- Driver input sensors (brake, throttle sensor)

**Race-Keeper Comparo**

Race-Keeper Com-par-o is our video data analysis software. Designed along with Race-Keeper hardware, Race-Keeper Comparo delivers comparison of two laps or two outings, side-by-side, video with video, data with data.
