Made in the USA

Just a quick reminder that Race-Keeper is designed, manufactured and assembled in the

Race-Keeper HE Successfully Launched at PRI and Autosport UK

We released Race-Keeper HE, a ruggedized version of Trivinci's pioneering single box video data system, at PRI and Autosport and it's in high demand. We've been busy taking orders from SCCA Pro Racing World Challenge, Formula Two, Formula Palmer Audi, and dozens of other individual club and pro racers and teams. Click to learn more about [Race-Keeper HE](#). Click to view a photo from our Autosport UK with one of our sponsored [British Girl Rally Racers](#).

World Challenge Series Selects Race-Keeper, Broadcast on Versus HD

Race-Keeper systems will provide data and video for the series' TV broadcasts on Versus HD, incident resolution, and of course, driver development for the teams. Rounds 1 and 2 of the World Challenge series are March 26-28 in St. Petersburg, let us know if you're visiting and we'll give you a close-up, behind-the-scenes view! Click to learn more about the [World Challenge Series](#).

Race-Keeper iDash Display in March!

iDash is almost here! Race-Keeper has been submitted to Apple for approval...we'll let you know when iDash is available! Race-Keeper iDash delivers live performance data - RPM, gear, speed, current lap, last lap, and best lap - transmitted wirelessly from Race-Keeper's on-board video data systems to the in-car dash display. Race-Keeper iDash also stores and displays start-finish lines, stats for saved track sessions, and configuration and calibration information. Click to view [Race-Keeper iDash](#) graphical design and data.

Continental Tire Challenge and Rolex 24

Race-Keeper made its 2010 competition debut at Daytona, in the Fresh From Florida 200. Click [Continental Tire Challenge](#) to learn TRG's results and to view photos of a
