

On-board Video Data Systems for Driver Development

Tuesday August 3, 2010

### New US Contingency Program

Race-Keeper will pay out for SCCA Solos, NASA Championships, and SCCA Run-offs. Click [Race-Keeper Contingency Program](#) for info.

### New UK/EU Dealers

Race-Keeper is expanding rapidly in UK and EU, with new customers and dealers in the UK, France, Poland and Czech Republic. Click [UK/EU Dealers](#) for info.

### Macintosh Version

You've asked for a Macintosh version of Race-Keeper Comparo and we listened - Mac and Linux versions coming soon!

### Formula 2 Series Thriving

2nd season for F2 series is in full swing! Click [F2](#) for more info. Click [Morroco](#) for on-board video of spectacular crash.

### World Challenge on TV/Web

Race-Keeper is the exclusive on-board video data system for SCCA Pro Racing World Challenge. Click [World Challenge TV](#) to watch the races!

### Formula Palmer Audi on Track

FPA added Race-Keeper to all cars in 2010...the systems have been a great success, proving impressively reliable and helping drivers continue to develop. Click [FPA](#) for info.

### Race-Keeper on Classic Cars!

Race-Keeper is proliferating in the Classic Sports Car Club, with numerous racing members competing with (and loving) Race-Keeper systems! Click [CSCC](#) for info.

## Race-Keeper Dual Stream Video Released

Race-Keeper is the ONLY video data system that can capture and play TWO full-resolution video streams.

Don't restrict your video to picture-in-picture - click [Dual Stream](#) to learn how to convert your PIP to full-screen!

## Race-Keeper HD Export Released

Race-Keeper HD export gives you the power to export your videos and animated data to a 1920x1080 HD file that you can play directly on your HD display or upload to YouTube.

Easy point-and-click interface, simple software add-on. Click [HD Export](#) for more information on how to export your Race-Keeper videos to HD!

## Bosch, MoTeC and Pectel Integration

Race-Keeper is releasing ECU-CAN data inputs from popular third-party ECUs. Integration of ECU-CAN data with Race-Keeper gives customers the power to capture many extra data channels directly from vehicle ECUs and display the data with automatically synchronized multi-camera video.

Within the next two weeks, Race-Keeper will make available ECU CAN stream decodes for Bosch Motronic 3.1, 4.1 and 4.3, MoTeC M800 Series, and Pectel MQ12. Additional ECU stream decode will be available in the near future. Click [Bosch, MoTeC and Pectel ECU CAN Decodes](#) for info.

## Race-Keeper iDash Updates!

Race-Keeper iDash is an in-car display using Apple iPhone or iPod Touch and showing live on-track data, including RPM, calculated gear position, speed, current lap, last lap, and best lap times transmitted via WiFi from Race-Keeper's on-board video data systems. We've been busy updating and adding features to iDash, make sure to go to Apple iTunes to update your application! Click [iDash](#) for info.

---

### Vipers Hit the Track with Race-Keeper

The Chrysler Group launched the inaugural Dodge Viper Cup series earlier this month at VIR. Race-Keeper is the official video data system of the Viper Cup, which fields the dazzling 2010 ACR-X.

Race-Keeper video is featured in the broadcast on the Versus TV network. Click [Dodge Viper Cup](#) for more info.
