

On-board Video Data Systems for Driver Development

Thursday November 18, 2010

#### Friend us at Facebook!

Friend us at [Facebook](#) and we'll automatically enter you in our 2010 contest to win a free Race-Keeper system!

#### New Videos on YouTube!

Subscribe to our Race-Keeper [YouTube](#) channel and we'll automatically enter you in our 2010 contest to win a free Race-Keeper system!

#### PRI Orlando Show Specials!

Visit us at [Booth 3519](#) at PRI in Orlando for special promotion...and if you mention this newsletter, we'll give you a free Race-Keeper shirt!

#### Autosport Show Specials!

Visit us at Stand 8708 at the NEC in Birmingham for special promotion... and if you mention this newsletter, we'll give you a free Race-Keeper shirt!

#### New Race-Keeper Comparo

Visit us at PRI and Autosport to preview our new Race-Keeper Comparo - even better video, improved GUI, compatible with Apple and Linux PCs and capable of comparing multiple track sessions simultaneously...

#### New Data Files Posted!

In addition to new videos from the 2010 racing season, we've added complete sets of video data files, including several championship races. Thanks to customers who have allowed us to post their data

## Congratulations to 2010 Champions!

Race-Keeper is proud to have been on-board with 15 champions across road racing, autocross, vintage, and rally spanning SCCA Pro Racing, SCCA Solo Nationals, NASA Championships, Formula Two, Dodge Viper Cup, Formula Palmer Audi, and FIA Rally Championships.

Visit [Race-Keeper](#) to see a slideshow and videos of winners on track with Race-Keeper on-board!

## F2, WC, Viper and FPA

Lots of acronyms - what do they all have in common?

Race-Keeper is the exclusive race video data system to four of the world's most challenging and exciting race series. We just completed our second successful season with Formula Two and our inaugural seasons with SCCA Pro Racing World Challenge, Dodge Viper Cup Series and Formula Palmer Audi, and we're on board with all four again in 2011... plus we'll have some more exciting news about new series soon!

Click to watch TV coverage of the [Race-Keeper World Challenge VIR Grand Prix](#) online!

## Expanded OBD-II Data Channels

In addition to speed, RPM, and throttle, we've expanded OBD-II to acquire and display seven additional data traces: engine coolant temp, fuel pressure, intake air pressure, manifold absolute pressure (MAP), mass air flow (MAF), fuel level, and calculated engine load value.

Best of all? The upgrade is FREE to OBD-II customers - simply update to the latest [Race-Keeper Comparo](#) and you'll discover the new data traces, synced perfectly and automatically with video.

files, which many consider strategic and confidential. Click [Data Files](#) to see the complete list and to download, play and learn using Race-Keeper Comparo.

#### **Race-Keeper User Guide**

You asked for, we published it - click [Race-Keeper System User Guide](#) for comprehensive system and Race-Keeper Comparo details.

### **Send to a Friend**

Send this email to someone you think may be interested.

Click [OBD-II](#) to learn more or to add plug n' play OBD-II to your Race-Keeper system.

---

### **Bosch and Pectel ECU Data Channels**

We've added Bosch and Pectel ECU-CAN data inputs to Race-Keeper's robust data logging capabilities, giving customers the power to capture many extra data channels directly from vehicle ECUs and display the data with automatically synchronized multi-camera video.

See [Bosch ECU](#) and [Pectel ECU](#) for more details on the additional data channels
