

On-board Video Data Systems for Driver Development

Thursday January 26, 2012

Free System Contest Winner!

We've selected the winner of our 2011 Free System contest!

Click [2011 Free System Contest Winner](#) to see who won!

Click [2012 Free System Contest](#) for this year's registration.

Porsche GT3 Cup iDash iPad

Check out these photos of Race-Keeper iDash displayed on an Apple iPad in a kickin' Porsche GT3 Cup!

Thanks to Gavin Riches of [Autoquest](#) for sharing the photos!

PRI and Autosport Success

Thanks for your many visits to our Race-Keeper stand at the PRI USA tradeshow in Orlando and the Autosport UK show at the Birmingham NEC.

Some of you got to view our RK-Streaming product demo, and some of you had a sneak preview of our new aluminum box (coming next month!).

Again, thanks, we always enjoy meeting our happy customers!

Exotic Driving Experience

If you're heading to Orlando, don't resist the urge to check out the new [Exotic Driving Experience](#) at Walt Disney World. And why does Race-Keeper recommend the experience?

MoTeC CDL3 Dash

Race-Keeper is pleased to announce that we are now officially a MoTeC dealer, specializing in the CDL3 Club Dash Display. When combined with Race-Keeper's video data system, the MoTeC dash display is the most powerful club-level driver development system on the market.

The beauty of working with Race-Keeper is our seamless integration of video with MoTeC data. Our MoTeC ECU integration software is a plug n' play solution which displays MoTeC data within our industry-leading Race-Keeper Comparo analysis software.

As part of our agreement, Race-Keeper offers full support and service of the MoTeC CDL3 Club kit. Click [Race-Keeper MoTeC](#) solution to learn more.

New Product: Remote Control

Race-Keeper just released our new Remote Control, which gives you the power to operate the Race-Keeper system remotely with the video data system secretly stowed away.

Manufactured in custom black anodized aluminum, the Race-Keeper Remote Control delivers a useful subset of controls and LEDs that match the same visual outputs of the Race-Keeper system. Click [Race-Keeper Remote Control](#) to learn more!

Because it's fun as heck! Blast around the modified speedway/road course in six exotic race cars, including two Ferraris, two Lambos, a Porsche 997 and an Audi R8.

And then analyze your track sessions with Race-Keeper Comparo, and walk away with your Race-Keeper dual stream video with full OBD2 data!

Revised Race-Keeper Comparo Software!

We've added (almost a) million new features to Race-Keeper Comparo software, many in response to feature requests from YOU, our customers!

The updates are designed to make Comparo even easier and more powerful!

- Added LOTS of new high-definition gauges:
 - BMW M5, Audi TT RS, Chevy Camaro, Porsche GT3 Cup
- Added digital text speed and RPM gauges
- Added last lap number and time to Video Player
- Added best lap number and time to Video Player
- Added "Lateral + Inline G (Math)" data type to Data Graph
- Added brake and gear gauges to Gauge Manager
- Added one-dot accelerometer circular gauge options
- Revised Gauge Manager layout
- Maximize outing window when a new outing is opened

Best of all? It's still free. Open and update Comparo today!
